SPRING 2025

ENJOY SPRING WITH THE POWER OF WOOL

Wool is the most recyclable fiber on the planet with high eco-credentials and a long-lasting life if treated correctly.

The superpower of wool is no news to us. We have been working with this fantastic fiber since 1879. We produce textiles without intermediaries and provide full traceability all the way back to the individual farmer.

Our signature blankets make your home a cozy place without compromising on the environment. They are suitable for all seasons, not the least during spring when the temperature can vary a lot. Wool isolates when it's cold and breathes when it's warm, what a perfect combination!

A SECOND CHANCE

Say hello to Frank, our first throw made from recycled blankets. We have found a solution to tear apart and spin new yarn from discarded blankets. The result is less waste and a beautiful throw with a lovely melange color tone. These throws are unique and the edition is limited, so don't wait too long.

SMULTRONBLOM

The pattern Smultronblom from 1947 was designed by the famous Gocken Jobs (1914-1995). It is a true Swedish classic that reminds us of beautiful summer days with "fika" in the garden.
